WORK EXPERIENCE

RSM US LLP | Washington, DC

Aug 2025 – Present

Data Scientist - Supervisor

- Built and deployed [RSM's AI Audit Readiness](#) platform on Microsoft Fabric, enabling real-time anomaly detection across 47M+ general ledger transactions to enhance audit efficiency and risk identification.
- Led and managed implementation of a custom data-driven claims adjudication platform for insurance clients, delivering \$500K+ in cost savings and reducing late claim processing by 95% within six months.
- Supervised and mentored a team of six Data Scientists, driving high-quality client deliverables and leading technical workshops.

Data Scientist - Senior Associate

Aug 2023 – Aug 2025

- Developed an AI-powered grant writing application leveraging Power Platform and OpenAI, reducing grant application drafting time by up to 70%.
- Led practice-wide agentic AI standardization, building reusable architecture and components that cut deployment time by 50% and boosted project margin by 10%.
- Served as AI subject matter expert (SME) in client engagements, leading solution architecture, scoping, and estimation for Agentic AI and Machine Learning initiatives.

Data Scientist - Associate

Jul 2021 – Aug 2023

- Built a member churn prediction model (80%+ recall) for a consumer-facing organization, enabling targeted retention campaigns that delivered 300%+ ROI.
- Developed a suite of analytics dashboards for client marketing teams, surfacing churn trends, customer behavior patterns, and market basket analysis to guide data-driven acquisition and retention strategies.
- Collaborated with clients to understand business needs and translated complex data into actionable visualizations that facilitated executive and cross-functional decision-making.

Carter Machinery | Salem, VA

Sep 2020 – Jul 2021

Team Lead - Business Analytics Consultant

- Developed a machine learning model that uncovered nearly \$4 million in potential customer sales at above a 90% accuracy rate.
- Built a customer acquisition analytics dashboard in Power BI, surfacing pipeline and conversion insights that guided marketing and sales targeting decisions for key leadership stakeholders.
- Applied sales data and market trend analysis to identify the highest-impact geographic and segment opportunities for resource allocation.
